Product Information

Purpose

Fluid-Bag Ltd. manufactures a UNIVERSAL Stretching Device specifically for filling and discharge of FLUID-BAG MULTI and FLEXI flexible containers.

UNIVERSAL fits all sizes of Fluid-Bag making it possible to

- stretch during discharge
- stretch during bottom filling
- stretch when filling through the top valve *)
- attach a Fluid-Bag stirrer.

Function

The basic stretching unit is supplied with a pneumatic cylinder.

The UNIVERSAL can be supplied with differing stands/ fixtures according to application

- wheels for maximum mobility. Can be used with both MULTI and FLEXI.
- quick locking attachment to the MULTI pallet.

The UNIVERSAL becomes an integral part of the MULTI allowing it to be moved as a complete unit.

- adaptor to attach the UNIVERSAL to a FLEXI pallet.

To attach the UNIVERSAL to the Fluid-Bag Inner Container two options are available depending upon application

- lifting tongs
- fork attachment. This can also be equipped with a filling Hose Support for top filling. A Fluid-Bag stirrer can be attached to this unit using a simple adaptor.

Economy

The UNIVERSAL is simple to use, makes filling and discharge fast and cost-effective.

*) For industrial filling of large volumes please refer to our product 620049 FLUID-BAG Filling Station.

Technical Data

Surface treatment.....Electroplated
 Air connection.....Quick coupling R 1/4 "
 Operating pressure, min.....5 bar

Weight, depending on
 type of model.....18 - 38 kg

Accessories, fork type of
 stretching device.....Hose support for top filling
 Fixation device for mixer
